

## **PURCHASED POWER ADJUSTMENT**

**MDPU No. 149**  
**Replaces MDTE No. 139**

The Department will calculate a charge or credit, the Purchased Power and Transmission Adjustment (“PPTA”) to be applied to all kilowatt-hours sold under rate schedules subject to this Purchased Power Adjustment. This charge or credit will adjust the revenues collected under the Generation Charge and Transmission Charge from all customers to be equal to the expenses charged to Accounts 555, 557 and 565, excluding the cost of power from the New York Power Authority and the kilowatt-hours of such power received. The over-collection or under-collection of such purchased power and transmission charges will be reviewed periodically and the PPTA will be adjusted as necessary.
